

Technology Spotlight: SafeToGo

Duty of Care enhanced through SafeToGo Technology to Track Travelers

A significant component of Acendas Travel's Mission Control traveler tracking utility is the SafeToGo technology developed by travel tech partner MagnaTech.

SafeToGo provides Acendas Travel the ability to follow travelers and pinpoint them in real time for the purpose of providing potential factors that might interrupt travel.

The proactive utility of the tool allows for contact with the traveler directly to provide information and offer options should they be necessary.

Key Features of SafeToGo:

- **Traveler Tracking Map & Dashboard** - Itinerary tracking (flight/hotel); GPS tracking; SMS messaging to individuals/groups; Client access to dashboard.
- **Flight Monitoring** - tracking flight disruption such as delays, cancellations, gate changes, etc., due to weather, staffing, equipment, etc.

- **Travel Alerts** - notifications emailed to travel arranger, booking agent, traveler, etc.; nature is travel safety and disruption, natural & environments, strikes & unrest, conflict & terrorism, health & medical, etc.; Country risk level, summaries and advisories.
- **Reporting Capabilities**
- **Fully Branded to Travel Management Company (TMC)**
- **Traveler Mobile Application**

The safety of your travelers should be paramount and that is enhanced by the ability to track them and connect immediately.

"Our technology focus is on making the travel manager's job easier and enhancing the travel experience."

*Brent Blake, President
Acendas Travel*
